

Die PostgreSQL Community

Bernd Helmle, bernd.helmle@credativ.de

11. November 2011

Der Weg zur “Community”

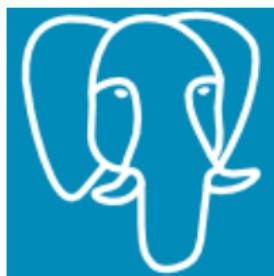

Der Name - PostgreSQL vs. Postgres

"Following recent discussions on a name change for the project, it has become clear that consensus within the community will never be reached. In light of this, the core team have discussed the matter in depth and decided that the project shall continue to use the name PostgreSQL, but accept the use of Postgres as an alias."

Slonik - Das Logo

PostgreSQL Global Development Group - Organisation

- Developer, Contributor
- Committer
- Core Team
<http://www.postgresql.org/community/contributors/>
- Infrastructure Teams

Community - Kommunikation

- Mailinglisten
<http://www.postgresql.org/community/lists/>
- IRC #postgresql, #postgresql-de, ... auf Freenode
- Jabber
- Conferences (PgDay, PgCon, ...)

Community - Sponsoring, Funding

- Regionale Gruppen
- “Überregionale Gruppen”
 - PostgreSQL Europe
 - US PostgreSQL Association
- SPI (Software In The Public Interest Inc.)
- Unternehmen

Developer vs. Contributor

- *Developer* arbeiten am Code
- *Contributor* entwickeln oder steuern Beiträge in anderen Bereichen bei
- “Major” Contributor

Committer

- Schreibzugriff im Git-Repository

"There is no defined process for how new committers are selected"

- Gute Code-Beiträge über einen längeren Zeitraum

- Finale Zustimmung vom Core Team

<http://wiki.postgresql.org/wiki/Commiters>

Core Team

- Projektziele
- Release Management
- Security Issues (Security Team seit 2007)
- Vergabe “Committer”-Status

Core Member

- Ernennung erfolgt von Core Membern
- Aktuell 6 Mitglieder: Bruce Momjian, Dave Page, Josh Berkus, Magnus Hagander, Peter Eisentraut, Tom Lane

Infrastructure Teams

- Webservers, Mailinglists, CVS/Git
- Pgbuildfarm, DNS, Mirrors
- Developer Hosts
- ...

Release Management

“Managing the development process is an ongoing challenge”

Peter Eisentraut, 2008

- Bug Tracking
 - pgsql-bugs@postgresql.org
 - <http://www.postgresql.org/support/submitbug>
- Security Fixes
 - security@postgresql.org
 - <http://www.postgresql.org/support/security>
- Übersetzungen
- Packaging
- Release, Press Notes

Pflege bestehender Releases

- 5 Jahre Unterstützung einer Hauptversion
- Minor Releases bei Bedarf
- Eher Richtlinie als streng formelle Versionspolitik
- EOL = Keine Releases der PGDG mehr

Entwicklungsphase

http://wiki.postgresql.org/wiki/PostgreSQL_9.2_Development_Plan

- Terminplanung
- Wann wird released?
- Patchreview
- Patchtracking
- Feature Freeze

Patchtracking - Das CommitFest

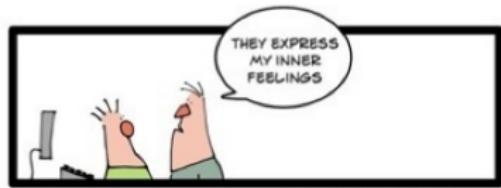

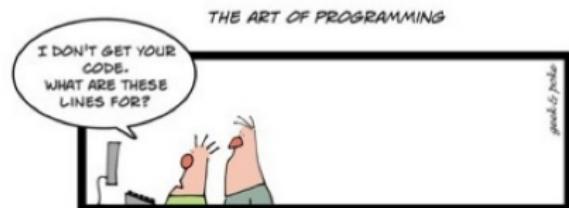

https://commitfest.postgresql.org/action/commitfest_view/inprogress

- Vierwöchiger Zyklus
- Alternativ “Reviewfests”
- Richtlinie, nicht streng formell
- Am Ende stehen Alphareleases

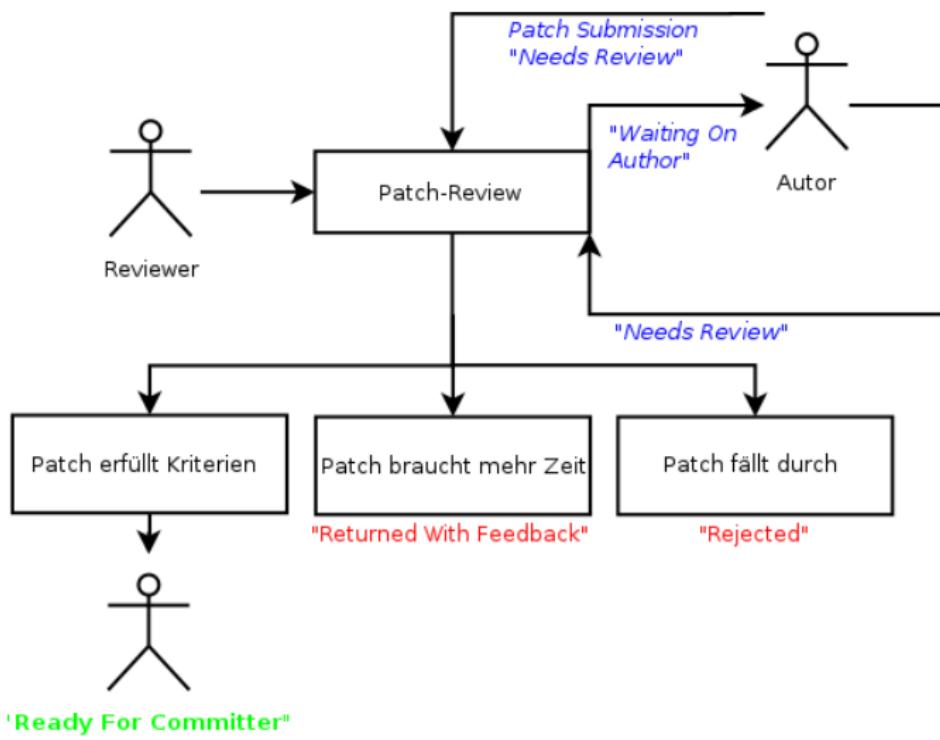

Review-Prozess

- Submission Review
- Usability Review
- Feature Test
- Performance Review
- Coding Review
- Architecture Review
- Review review

Review-Prozess

http://wiki.postgresql.org/wiki/Reviewing_a_Patch

Round Robin Reviewer

- Bekommen Patches vom CommitFest Moderator zugewiesen
- <http://archives.postgresql.org/pgsql-rrreviewers/>
- IRC #pg_charlie_foxtrot auf freenode.net

Roadmap? Nennen wir's "ToDo" ...

<http://wiki.postgresql.org/wiki/Todo>

- Bugs und Feature Requests
- Recht viele komplexe Punkte
- Bei Interesse lohnt Recherche in archives.postgresql.org

Test - Das Pgbuildfarm Projekt

<http://www.pgbuildfarm.org>

- Verteiltes Buildsystem
- Verschiedene Plattformen, Compiler, Architekturen
- Backbranches
- Äußerst Wertvoll um Architekturprobleme zu erkennen

Was kann ich nun tun?

- “Developers, Developers, Developers”
- CommitFest benötigt Reviewer
- Dokumentation
- Test
- Organisation
- Usergroups
- Feedback

Community

"You don't interact with it, you are part of it" - Linus Torvalds

Feedback:
