

Features

- *Master - Slaves*
- *Record-based log shipping*
- *Shared nothing*
- *No SQL restriction on master*
- *Per database cluster*
- *Various synchronization modes*
 - *Before a transaction returns a "success", it waits for :*
 1. *nothing* -- *async*
 2. *recv ACK* -- *recv*
 3. *fsync ACK* -- *fsync*
 4. *apply ACK (not fsync)* -- *apply*
- *Built-in*
