

# PostgreSQL for maps in Armenia

ԲԱՐԻ ԳԱԼՈՒՍ ՀԱՅԱՍՏԱՆ  
Welcome to Armenia

Jan Bjurström

GIS consultant, Geospatial database specialist

B.Sc physical geography

Licentiate of Architecture

Metria, part of Lantmäteriet, The Swedish mapping, cadastre and land registration authority

jan.bjurstrom@lm.se

# Briefly what I'm gonna talk about:

- **Armenia, a short presentation**
- **The Development of Cadastre system in Armenia**  
"the overall objective is to establish a well-functioning property market, to improve the market economy in Armenia"

- -

# Briefly what I'm gonna talk about:

- **Armenia, a young old country**

- **The Development of Cadastre system in Armenia**

"the overall objective is to establish a well-functioning property market, to improve the market economy in Armenia"

- Geodetic Network with GPS technology

- Aerial photography

- Cadastral index maps

- Valuation and taxation

- Training

- Study visit to Sweden

- Map data, client and database production environment

- **The Map data production system**

Armenia, acknowledged as a republic in 1991

# Armenia, acknowledged republic since 1991

- Area, about as Belgium: 29 800 km<sup>2</sup>
- Altitude, 400 – 4000 meters
- Continental climate
- Population, 3.3 milj
- Capital, Yerevan, 1.3 milj
- >97% can read and write
- Language, Armenian Արգդերթժ and english, russian before 1991
- Natural resources: Gold, copper, zinc
- 47% of land area is
  - Milk-meat cattle- and sheep -breeding
  - Grapes-Vegetables- fruit –growing
  - Vineyards
- Exports Mineral Water, Cognac Ararat, Wine and Fruit jam.

evening of  
Yerevan

# The project

”Development of the Cadastral System in Armenia”

- Started 1999, financed by SIDA, Swedish International Development cooperation Agency
- *The State Committee for Real Estate Cadastre*
- Derive a new geodetic reference system and create a new geodetic network
- Connected to global/European EUREF 89 (GRS80)
- Surveying with GPS equipment
- Horizontal accuracy 1-2 cm, Vertical accuracy 2-4 (3-5) cm between zero and 1<sup>st</sup> order networks
- ARMREF02.

# The project

”Development of the Cadastral System in Armenia”

- Legislation
  - Real estate property registration -USAID
  - Land information system -SIDA
  - Fundamental for property evaluation and market appraising.
  - Must be known as Official and National Information System
  - Uniform usage
- Successful implementation of Land Reform Privatization finished in april 1993. The new Cadastre system 1997
- 10 years anniversary 2007 ”...could serve as a good example to other countries...” (European comittee).

- 
- Mapping clients and data storage
    - Surveying instruments, total stations
    - CAD
    - ArcGIS
  - X;Y;Z files, or geodatabase objects
  - dgn files and geodatabases on disk migrating to PostgreSQL geodatabases
  - PostgreSQL GeoSpatial Database for parcels and topographic maps on community- and national levels.
